Funding for this conference is provided by Minnesota State Colleges and Universities and by the Minnesota Energy Center.

The MN Energy Center consists of ten Minnesota State colleges working together to provide energy education across the state. Approximately forty academic programs are offered through this group of colleges. These programs are developed and managed in partnership with a wide variety of energy industry businesses and corporations. The entire partnership is focused on preparing the best educated workforce in an effort to build and maintain the energy industries both now and in the future.
